<u>User Stories:</u>

As a user, I want to be greeted by a good looking, modern website that is nice to see.

As a user, I want to be able to search a certain place by name and by filtering certain things (vegan place, price range, rating stars, cuisine etc...)

As a user, I want to be able to see details about the place, such as address, phone number, schedule, menu, etc...

As a user, I want to be able to see photos of the place as to make an idea about the location and the ambiance.

As a user, I want to be able to give feedback to the place by both rating and commenting as to help others pick the right place.

As a user, I want to be able to read others' reviews as to make an idea about the place.

As an admin, I want to be able to add, delete or modify the places to keep everything (location, photos, description, menu, etc..) updated.

As a moderator, I want to be able to see all reviews and be able to delete them if they are malicious or do not follow a good etiquette, such as offensive ones or spam.

* Managers and the reservation feature are in plan but not a priority, thus they might not make the final cut.

As a manager, I want to be able to see reservations to my place.

As a manager, I want to be able to propose updates to the place's description, photos, menu, etc...

As a manager, I want to be notified of new reservations.

As a user, I want to be able to see whether a place is fully reserved and make a reservation if not full.
